### DETAILED ACTION

1. This Office Action is responsive to Amendment filed 03/22/04 in which claims 1, 5-6, 12 have been amended. Claim 2 has been canceled. Claims 14-17 have been added.

Applicant's previous arguments are moot with regard to claim 12 in view of the new rejection. Claims 1, 3-11, 13-17 are allowed.

If a copy of a provisional application listed on the bottom portion of the accompanying Notice of References Cited (PTO-892) form is not included with this Office action and the PTO-892 has been annotated to indicate that the copy was not readily available, it is because the copy could not be readily obtained when the Office action was mailed. Should applicant desire a copy of such a provisional application, applicant should promptly request the copy from the Office of Public Records (OPR) in accordance with 37 CFR 1.14(a)(1)(iv), paying the required fee under 37 CFR 1.19(b)(1). If a copy is ordered from OPR, the shortened statutory period for reply to this Office action will not be reset under MPEP § 710.06 unless applicant can demonstrate a substantial delay by the Office in fulfilling the order for the copy of the provisional application. Where the applicant has been notified on the PTO-892 that a copy of the provisional application is not readily available, the provision of MPEP § 707.05(a) that a copy of the cited reference will be automatically furnished without charge does not apply.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claim 12 is rejected under 35 U.S.C.102 (e) as being anticipated by Chang et al US 2003/0028843.

**2. As per claim 12:**

Chang teaches a method of outputting data from a memory, comprising the steps of: Sequentially storing input data into memory [e.g., memory holds parity bits samples in sequential; col. 3, [0025]; claim 2]; determining the size of the stored input data [col. 4, [0049]]; receiving a first control signal and generating a first index [e.g., processing at the first component decoder .... Associated with the Kth first index value; col. 6, claim 2]; comparing first index to data size and generating a second index if first index is greater than data size; outputting a memory address associated with first index if second index is not generated and outputting a memory address associated with said second index if said second index is generated [e.g., processing at the first component decoder ... associated with the Kth first index value.... If the Kth first index value is equal to or greater than M; claim 5].
